CAREER OBJECTIVE

AIML engineering student with a strong foundation in Python, data analysis, and AI model development. Passionate about creating scalable AI-driven solutions that deliver tangible real-world impact through innovative applications of machine learning, deep learning, and computer vision technologies.

TECHNICAL SKILLS

Languages	Python, Java ,HTML, CSS, JavaScript
Libraries & Tools	Pandas, NumPy, Matplotlib, Seaborn, Git, GitHub, TensorFlow
Core Technologies	Machine Learning, Deep Learning, Generative AI, LLM, REST APIs, Streamlit
Databases & OS	SQL, MySQL Linux, Ubuntu, Windows
Core Subjects	DSA, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering,
Cloud & DevOps	Google Cloud Platform (GCP), API Integration, Backend Development

WORK EXPERIENCE

- Altimetrik Pvt. Ltd. – AI/ML Engineer (*Current*)
- DigitaltransSolution AI Pvt. Ltd. – AI/ML Engineer Intern
- EssilorLuxottica – AI/ML Automation Intern
- Wipro – Project Intern (Google Cloud Platform)

PROJECT'S

Google Cloud Platform -

- Woked on client-side AI/ML solutions in the GCP ecosystem, contributing to internal and POC-based projects. Developed and tested Proof of Concepts (POCs) using **GCP Agent Development Kit (ADK)** for intelligent automation workflows.
- Designed and implemented multi-agent systems using **MCP (Model Context Protocol)** for log error detection, Prompt evaluation and automated correction.
- Performed prompt engineering and prompt evaluation **to optimize LLM responses** for accuracy and efficiency. Conducted agent evaluation and **performance tuning**, improving reliability and response quality of AI agents. Integrated tool calling mechanisms within agents to enable dynamic execution of tasks and workflows Collaborated Agent to Agent (**A2A**) on client-focused internal projects, ensuring solutions aligned with **real-world** use cases and scalability requirements.

AI-Powered Competitive Intelligence Orchestrator –

- Used **LangGraph** and **Neo4j GraphRAG** to analyze the strategic positioning of major IT services firms (Infosys, TCS, Wipro, HCLTech, Accenture).
- Designed an autonomous **multi-agent pipeline** that crawls investor relations and news sources, extracts strategic entities (AI brands, partnerships, investments), and structures them into a knowledge graph using subject-predicate-object triples.
- Implemented graph-based reasoning to answer inference-driven queries such as partnership overlaps, NVIDIA exposure, and AI expansion strategy. Developed a **FastAPI backend** integrated with **Ollama (Qwen 2.5 7B)** and built a dashboard to visualize knowledge graphs, executive summaries, and competitive comparison tables.

Schedura – Enterprise AI Healthcare Voice Agent Platform

- Built a production-ready **Agentic AI** platform using LLMs, **FastAPI**, **AWS Lambda**, **DynamoDB**, **Redis**, **Multi-Agent Systems**, **Voice AI (STT/TTS)**, **Twilio**, **Google Calendar**, and **Razorpay**.
- Implemented intelligent appointment scheduling, AI voice conversations, payment orchestration, calendar integration, reminder automation, and AI-generated consultation summaries within a scalable serverless architecture.

Education

- | | |
|--|-----------------------------|
| • Dr.Ambedkar Institute of Technology | Bengaluru, Karnataka |
| <i>B.E in Artificial Intelligence and Machine Learning</i> | <i>2022- 2026</i> |

Achievements & Activities

- Member, Speed Cubing Bangalore - Organized official WCA competitions, including Karnataka Cube Championship 2024, Recognized by the **Asia Book of Records** and the **India Book of Records** as part of Team Recode for creating the large-scale “Mission Sindoor Cube Mosaic” at Forum Mall, JP Nagar (Jan 2026)
